Digital information

Accuracy enhancing hands-free system directly affixes to gun scopes or spotting scopes. Exotic prism design allows small footprint and light weight, in addition to unhindered sight picture of original scope. System will not affect use of an optical device in the event of a failure. As user aims at targets, embedded camera zooms display to the right of rifle scope. Ballistic computer calculations can be overlaid on zoomed image. Design is extremely flexible, leading to enhancements, such as embedded ballistics, enhanced low-light imagery, IFF, and target geo-location. Features include:

- Embedded camera/heads-up-display
- Full ballistic computer (optional)
- Low power usage
- True hands-free operation
- Low-light vision enhancement w/o changing true axis
- Attainable cost
- Fault Tolerant / No moving parts
- Extended capabilities / Multi-spectral sensing through scope

	DeadEye P10	DeadEye P15	DeadEye P20
Attachment	Leupold Mark 4 Spotting Scope	Leupold Golden Ring Spotting Scope	variety of gun scopes
Camera	¼" CCD, color or b/w	¼" CCD, color or b/w	¼" CCD, color or b/w
Display	LED or OLED, 640x480	LED or OLED, 640x480	LED or OLED, 640x480
Size	4.9" x 1.8" x 3.4"	5.1" x 3.5" x 3"	3.8" x 4.4" x 3.3"
Weight	185 grams	550 grams	601 grams
Power	4 AA batteries	4 AA batteries	4 AA batteries
